SUMMARY

Backend and AI Engineer skilled in building event-driven microservices, distributed systems, REST APIs, and AI/ML applications using Java, Python, Node.js, Kafka, Docker, and modern data technologies.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Backend: Node.js, Express.js, REST APIs, GraphQL

Databases: MySQL, MongoDB, PostgreSQL

Distributed Systems: Microservices, Event-Driven Architecture, Apache Kafka, Saga, Transactional Outbox, Idempotency

AI/ML: LLMs, Agentic RAG, LangChain, LangGraph, LLM Evaluation, AI Guardrails, Computer Vision, YOLO

Tools & Cloud: Docker, Git, GitHub, Linux, AWS Fundamentals

Engineering: DSA, OOP, DBMS, OS, Computer Networks, SDLC, Agile/Scrum, Automated Testing, CI/CD

Frontend: HTML5, CSS3, React.js, Tailwind CSS

EXPERIENCE

Truepad

Software Engineer

Remote

Jul 2025 – Apr 2026

- Delivered end-to-end onboarding and authentication with OTP verification, session management, and user profiles, reducing user drop-off by **30%** in the measured cohort.
- Architected real-time room synchronization for **500+ concurrent users** using Pusher and shipped a PostgreSQL-backed admin panel for moderation and reporting across **10K+ user records**.

RoboAreana

Product Development Intern

Pune, Maharashtra

Feb 2025 – May 2025

- Developed web-based applications for product workflows, translating research-driven methodologies into application logic, interfaces, and functional workflows.
- Integrated applications with embedded systems for hardware-software communication and control workflows, testing end-to-end interactions to improve system usability.

PROJECTS

NexLink — Event-Driven Microservices Platform

GitHub

Node.js, Express.js, Apache Kafka, MongoDB, GraphQL, Docker, JWT

- Built a **six-service event-driven platform** using Apache Kafka to decouple user, workflow, notification, analytics, and API operations, addressing reliability and coupling challenges of synchronous communication.
- Designed a stateful workflow engine with **configurable retries, exponential backoff, parallel execution, and duplicate-execution prevention**; added JWT, GraphQL, rate limiting, structured logging, Docker, and validated the flow with **17/17 integration tests**.

AI Research Assistant — Agentic Hybrid RAG & Evaluation

GitHub

Python, LangGraph, Groq, Qdrant, Elasticsearch, BM25, RRF, Cross-Encoder, RAGAS, Langfuse, FastAPI, Docker

- Built an agentic research assistant using **LangGraph** over **100+ arXiv papers**, orchestrating retrieval, validation, web fallback, and grounded response generation.
- Implemented **hybrid retrieval** with Qdrant, Elasticsearch BM25, RRF, and cross-encoder reranking, improving retrieval accuracy by **14.6%** over conventional vector search on a **50-query golden benchmark**.

KrishiNetra — Edge AI Crop Disease Detection

Group Project

Python, YOLO, TensorRT, NVIDIA Jetson Nano, ESP32, Random Forest, Linux

- Developed and deployed a **YOLO-based computer-vision pipeline** on **NVIDIA Jetson Nano** for offline cotton disease detection using GPIO-triggered inference for low-latency edge diagnosis.
- Combined image detection with IoT sensor parameters and a **Random Forest model**, achieving **97% prediction accuracy** and presenting disease and remedy recommendations through Streamlit.

CERTIFICATIONS

AWS Cloud Practitioner Essentials

Nutanix Certified Associate 6 (NCA-6) — Nutanix

IBM AI Skill

Builder — IBM

Java & Software Engineer — HackerRank

Introduction to Generative AI — Google Cloud

ACHIEVEMENTS & EXTRACURRICULAR

- **PBL:** Secured 2nd prize for the Crop Disease Detection at Edge project during the Industry Conclave.
- **Merit Scholarship:** Awarded College Merit Scholarship for ranking in the **Top 4 of the batch** for four consecutive semesters.
- **Smart India Hackathon 2024 & 2025:** Selected among the **Top 50 teams out of 150 teams** at the college level.
- **IEEE R@10:** Developed Flood Sense and presented the project in the IEEE R@10 challenge panel.
- **MYOSA – IEEE:** Developed AI-powered smart spectacles with real-time object and face recognition and an alert system, integrating microcontrollers, sensors, and computer vision algorithms.

EDUCATION

Symbiosis Institute of Technology, Pune, Maharashtra

Bachelor of Technology

2023 – Present

CGPA: 9.34/10
